

Thames Bank residents – Andrew Howard-Smith

Our residents have concerns about effect on character of our area, building height behind Thames Bank, being overlooked, Secondary school and general disruption of demolition and building works. This is explained in more detail in a paper submitted to the MBCG committee in February of this year.

We see our remit as being to protect the character of our area as one of its historical landmarks and to support the interests and concerns of our residents in terms of disruption and impact on their way of life and.

In terms of what needs to be done in the short term and the skills that would be helpful for our group to pursue our remit we would like the following:

- to be involved in the initial site design consultation process,
- to be allowed to make our concerns and views known at an early stage.

To do this we would need the support and guidance of a qualified architect with town planning experience.
